Developing Core Maths Pedagogy

Help your students see the real-world power of maths! This work group explores ways to make Core Maths lessons more engaging and relevant, focusing on problem-solving, reasoning, and contextual applications that build mathematical confidence beyond the classroom.

Who can take part: Teachers currently delivering Core Maths or planning to introduce it in their school or college.

What you'll learn: Explore effective teaching strategies, share classroom ideas with peers, and strengthen your understanding of how Core Maths supports students' progression and problem-solving skills.
