

## June 2025 update

As we head into the final term of this academic year, we would like to update you with information on a few programmes with fast approaching deadlines to apply.

In addition, we have included information with the release of our full catalogue with all the professional and school development opportunities on offer, and how to sign up.

The update includes

- **Final Call - Last chance to apply**
  - Secondary Mastery Specialist programme 2025/26
  - Post-16 GCSE and FSQ Mastery Specialist programme 2025/26
  - SKTM Secondary Non-Specialist Teacher (EEF Trial) 2025/26
  - Mastering Number at Reception and KS1 2025/26
- **London South West Maths Hub 2025/26 Full Catalogue**
- **Express an interest in our 2025/26 programmes**
- **Maths Week London event 23 – 27 June 2025**

### Final Call - last chance to apply

Applications are closing for the following funded 2025-26 leadership programmes. These fully funded programmes are designed to develop teachers as experts in teaching for mastery and the leadership of professional development. Applications must be submitted by 10 June 2025. Please email us if you would like more information - [info@london southwestmathshub.co.uk](mailto:info@london southwestmathshub.co.uk)

### Secondary Mastery Specialist programme 2025/26

Want to become a specialist in teaching for mastery and support your own school to develop teaching for mastery approaches? Join the Secondary Mastery Specialist Programme. During the course of the programme you will receive fully-funded professional development from experts, have time to develop your own expertise, and then go on to support others.

Any teacher (excluding ECTs) who is teaching maths in a state-funded secondary school in England and who wishes to develop both their own classroom practice and their skills in leading professional development with others, can apply to become a Secondary Mastery Specialist.

Learn what's involved in the application process by downloading this [updated information document](#). More information [here](#)

### Post-16 GCSE and FSQ Mastery Specialist programme 2025/26

This programme is for practitioners of post-16 GCSE Maths resit and/or Functional Skills Maths who are currently employed in a post-16 setting and regularly teaching maths to students aged 16-19. Participants must have at least two years' experience teaching post-16 GCSE/FSQ maths, with the capacity to lead change within their own institutions. They may be based in FE colleges, Sixth Form colleges, or other post-16 settings. Learn what's involved in the application process by downloading this [information document](#). More information [here](#)

## Final Call - last chance to apply

### SKTM Secondary Non-Specialist Teacher (EEF Trial)

#### EEF Funded Trial - 2025/26 SKTM Secondary Non-Specialist Teacher programme

We're excited to let you know about a highly regarded Specialist Knowledge for Teaching Mathematics (SKTM) programme aimed at secondary non-specialist maths teachers.

Fully funded EEF trial

### Specialist Knowledge for Teaching Mathematics (SKTM)

Secondary Non-specialist Teachers Programme

There are significant numbers of people teaching maths in secondary schools without specialist initial teacher training (ITT) in maths. This programme supports these teachers to develop the specialist knowledge for teaching maths – a blend of subject knowledge and pedagogical knowledge.

Working in partnership with London Central and West Maths Hub, the SKTM Secondary Non-Specialist programme is completely FREE to state-funded participating schools, and is part of a fully funded Education Endowment Fund (EEF) Trial. Participating schools, working with their local Maths Hub, will also be contributing to the EEF's evidence base for interventions aiming to address the shortage of mathematics teachers within England.

#### Who can take part?

It is open to non-specialist maths teachers who will be teaching Year 8 in 2025/2026 and based in Kingston upon Thames, Merton, Richmond upon Thames, Sutton and Wandsworth state-funded schools.

To find out more, please [download the information sheet](#), which includes full details of the programme, the EEF trial, and how to apply. You can also [listen to the NCETM's podcast to hear from a non-specialist maths teacher and his Head of Department](#) about how valuable they found this course.

#### How to apply

To sign up, please [visit the London Central and West Maths Hub website](#).

### Mastering Number at Reception and KS1

This project aims to secure firm foundations in the development of good number sense for all children from Reception through to Year 1 and Year 2. The aim over time is that children will leave KS1 with fluency in calculation and a confidence and flexibility with number. Attention will be given to key knowledge and understanding needed in Reception classes, and progression through KS1 to support success in the future.

**The short video gives a flavour of Mastering Number happening with different age groups. The teachers explain how the programme has benefited all pupils in their classes, providing firm foundations for later work in maths.**

<https://vimeo.com/1074631531>

#### Who can take part?

This programme and its Work Groups are open to all primary state-funded schools that have not yet engaged with the Mastering Number programme. [Click here for more information and to express an interest for 2025/26](#). **Deadline to apply is 6 June 2025.**

# 2025/2026 London South West Maths Hub FULL Catalogue

We have something for everyone in our provision for 2025/2026. View online or download the [London South West Maths Hub 2025/26 catalogue](#) to see the full Maths Hub programme offer.

All projects are free of charge to state-funded schools/organisations.

## Types of school and professional development activity

<b>Work Group</b>	Work Groups have an emphasis on collaborating to support school or department-wide development in maths, as well as supporting individual professional learning and development. Lead participant teachers develop their own practice by trying out new approaches in their own classrooms, and work with their colleagues in school to share ideas and establish approaches across their school or department. They also meet regularly during the year to collaborate with their peers locally. Work Groups are led by a teacher (or former teacher) expert, who is experienced in both maths education and in leading teacher professional development.
<b>Programme</b>	Programmes support individual teachers or leaders of maths in their professional development. There are two types: Specialist Knowledge for Teaching Mathematics (SKTM) programmes, where individuals develop specialist knowledge to improve their practice and local leaders of mathematics education (LLME) development programmes, to equip practitioners to lead work with teachers and schools. Both involve participants joining a national or regional cohort of colleagues from other schools or colleges, and exploring centrally-produced NCETM materials.
<b>Community</b>	Professional learning communities also emphasise supporting individual teachers or leaders of maths in their professional development. Participants collaborate formally and informally, over a sustained period of more than a year, to deepen their understanding of maths culture, curriculum, pedagogy, and professional development. Community Leads establish a professional learning culture that creates professional dialogue and mutual support, offering their own expert input where appropriate.
<b>Targeted Support in Maths</b>	Targeted Support in Maths supports primary and secondary schools to make sustained change in maths through a bespoke offer over a sustained number of agreed days. Local leaders of maths education (LLMEs) from the school's local Maths Hub will work with participating leaders to develop their understanding and practice of developing maths, underpinned by the key features of the EEF implementation cycle. Leaders will meet regularly with their LLME over a planned period of time and will collaboratively explore, plan, deliver and evaluate a development focus in maths. The collaborative professionalism between the school leader(s) and the LLME aims to develop a long-term professional learning relationship between the school and Maths Hub.

### How can you get involved?

Discover the professional development opportunities your local Maths Hub is offering in this catalogue. Then get in touch with your local hub to book your place.

Maths Hubs provide something for everyone and every school. Don't miss out!
