

Become a Maths Champion

Giving early years practitioners the confidence, tools and expertise to embed powerful maths learning into every corner of your setting.

Maths Champions from National Day Nurseries Association (NDNA) gives your team everything they need to make maths engaging, meaningful and natural in your setting.

Why choose Maths Champions?

- Practical tools and resources to embed maths into play and routine
- Support that fits around your schedule and setting, with twelve months to complete the programme
- Evidence-based training that helps your team feel confident about early maths practice.

Real impact for children

Children develop stronger early maths skills while practitioners grow in confidence and capability. Maths becomes an intentional and meaningful part of everyday learning, with progress that can be clearly seen and measured.

Independent research shows that children in participating settings **make up to three months additional progress in maths and language development**, rising to as much as **six months for disadvantaged children**.

Backed by the Department for Education and independently evaluated by the Education Endowment Foundation, Maths Champions is proven to improve early years outcomes and give children a stronger foundation for future learning.

Join the growing number of settings already making a difference.
