BENEFITS

Participants and their schools will

- ✓ Gain an overview of mastery; how it's evolving within South West London **and its impact on mathematics pedagogy, as well as pupil outcomes**
- ✓ Focus on a mastery principle in lesson design. We will unpick the theory behind the mastery approach as well as give participants the opportunity to put this theory into practice during the session. We will share mastery resources and exemplar lesson material that you can use in department CPD sessions
- ✓ Find out more about the Mastery Advocate Programme, specifically the Developing Work Group. This fully funded programme has been described as **'the best CPD I could've done'** and has had a significant impact on participating schools. Within the session you will hear from current advocates about their positive experiences.
